

Action in the Field

Brief Activity Report

Jon Echanove (standing), TRTA Senior Standards and Conformance Expert discusses before the participants the rules and regulations of implementing standards-based administrative order of the Department of Trade and Industry.

Setting in Motion. Participants from the Department of Trade and Industry and the electronic and electrical sector gather in a seminar that will orient them on the new standards harmonised or adopted from International Electro-technical Committee standards on low voltage equipment. The harmonisation is seen to expand the PH export window of electronic and electrical products to the world market.

| | |
|---------------------|--|
| Component | Standards Harmonisation and SPS Conformity |
| Implementing Agency | Department of Trade and Industry — Bureau of Product Standards (BPS) |
| Activity | Seminar on DAO 03, Series 2008 on LVE and its Implementing Rules and Regulations |
| Date/Site | 8-9 December 2011 / Waterfront Insular Hotel, Davao City |
| Participants | 15 DTI personnel 13 participants from the electronic and electrical sector |
| Resource-person | Senior Standards and Conformance Expert (KE3) Jon Echanove |
| Outcome | Participants acquired understanding on the importance of the harmonised LVE standards and the conformance requirements particularly to the manufacturers of electronic and electrical products. |
| Objective | To raise awareness, understanding, knowledge of the stakeholders on the DTI Department Administrative Order (DAO) Number 3 Series 2008 — Rules and Regulations Concerning the Safety of Low Voltage Equipment (LVE). To gather feedback on possible obstacles or constraints on the implementation of the DAO 3, S. 2008. |
| Methodology | Lecture Group Exercises Discussion |
